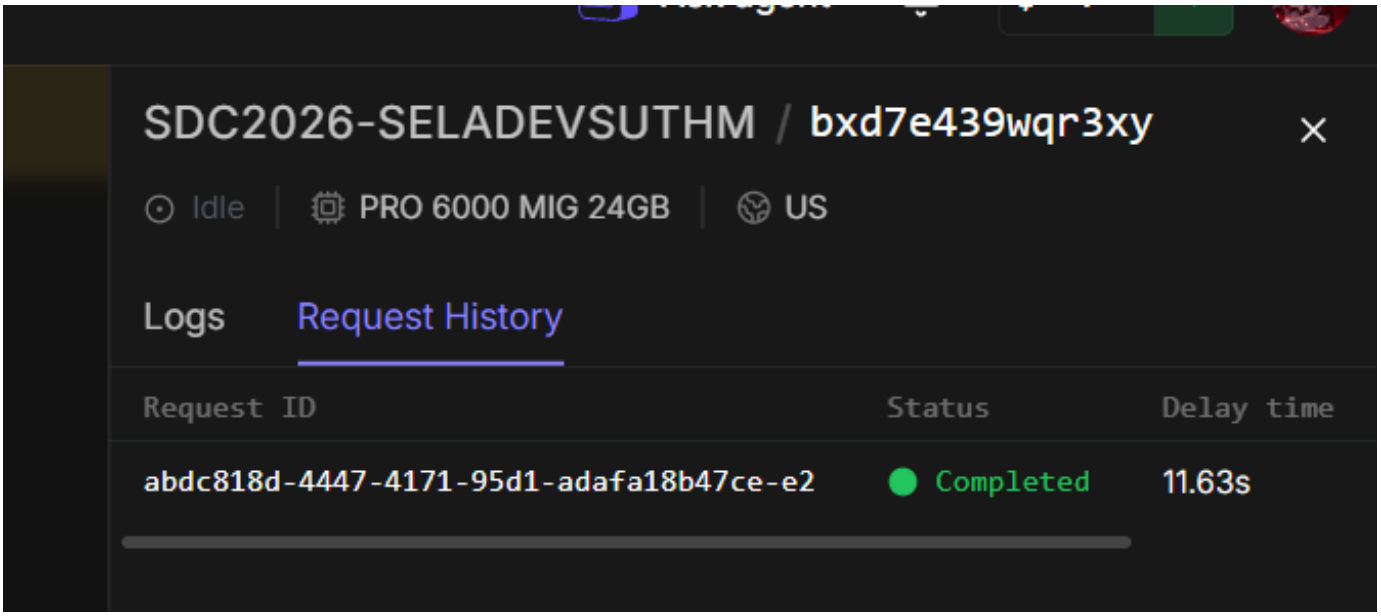
RunPod usage evidence

Completed E5 CUDA inference - 25 October 2026, 03:11:44 MYT

One fictional learner query was compared with two authored role-description passages. This record demonstrates a direct worker inference. It does not establish application gateway integration, Career Council execution or model quality.

Endpoint	7ib627oev3kwlb
Job / status	abdc818d-4447-4171-95d1-adafa18b47ce-e2 / COMPLETED
Model	intfloat/multilingual-e5-base
Pinned revision	d128750597153bb5987e10b1c3493a34e5a4502a
Device / hardware	cuda / PRO 6000 MIG 24GB, US (dashboard label)
Provider execution	3,452 ms (3.452 seconds)
Queue delay	11,626 ms (11.626 seconds)
Raw cosine results	data-analyst: 0.858772; cloud-support: 0.761758

Original own-account request-history capture



Screenshot and completed response supplied by the team. The response passed the application output validator against the original synthetic input. Similarity values are not employment probabilities or proficiency assessments.

Completed provider response

Exact JSON response retained with the source evidence

Endpoint API: https://api.runpod.ai/v2/7ib627oev3kwlb/runsync

Build log: the pinned E5 snapshot downloaded; nine offline tests passed; the image built and uploaded successfully. Image tag: registry.runpod.net/hzqfarhan-sdc2026-seladevsuthm-main-dockerfile-e5:f98dd67e3

Reported times describe this single fixture. Queue delay and provider execution are separate measurements. No training, fine-tuning, representative latency benchmark or outcome study is claimed.
